WELCOME

The University of Reading is a truly international institution, with established links to education providers and businesses around the world and with a vibrant global student and alumni network. We are very proud of our excellent record of educating talented students who go on to make a significant contribution in their chosen careers.

The establishment of our first overseas campus in Malaysia is a flagship project for the University of Reading. It signifies an important milestone in our ongoing expansion and is a natural extension of the particularly close ties that we have enjoyed in Malaysia over many years.

I am delighted to be able to take the University of Reading experience to a global audience. I expect our world-class strengths in research and teaching to make a lasting impact in this dynamic and exciting region, equipping the next generation to rise to the challenges of an increasingly globalised economy.

Sir David Bell
Vice-Chancellor

Message from the Provost

The University of Reading has been successfully educating international students for more than a century. Malaysian graduates of the University are already leading businesses and professions and contributing to public life, all over the world – not least here in Malaysia.

Now students will be able to have the best of both worlds – the chance to study for a UK degree but in dynamic Malaysia. Whether studying one of Reading’s traditional strengths or with the world-class Henley Business School, students can expect a rigorous and challenging education in a friendly, supportive and internationally diverse environment, taught by the best academics in their field. Here is where future leaders will thrive.

Asia is the continent for the 21st century and the most exciting region in the world. We’re proud to be part of it and are ready to welcome students to our new home.
OUR VISION

The University of Reading Malaysia (UoRM) gives students the best of both worlds: the opportunity to study for a UK degree from a state-of-the-art campus in EduCity in Iskandar Puteri, Johor, Malaysia.

We are the first overseas campus of the University of Reading in the UK – ranked one of the world’s top 200 universities, with an international reputation for the quality of our teaching and research.

Uniquely, we give students the opportunity to study part of their course in the UK, making getting a UK degree more flexible, accessible and affordable than ever before.

University of Reading students from the UK are also given the chance to study at UoRM, enabling even greater international collaboration and enhancing the teaching and learning experience for all.

Students will be taught by international academic staff – the best in their field – and have the same top-quality learning experience as in the UK. The University of Reading is home to the world-renowned, triple-accredited Henley Business School, and together, we have high standards and expectations. We offer an up-to-date and innovative approach to teaching, designed to get the best results and ensure that our graduates excel in their chosen careers.

The University of Reading Malaysia provides students with a top-class education – at approximately half the cost of international student fees in the UK. A range of scholarships – some worth up to 100 per cent – are available to reward the brightest and the best students.
OUR CAMPUS

Our impressive campus at EduCity offers an architecturally stunning environment designed to provide students with everything they need to make the most of their time at university. Its breath-taking design was `shortlisted for a World Architecture Festival award in 2013.

Made up of two buildings linked by a central parkland area (the ‘Heartspace’), the campus is an integrated, self-contained site combining flexible teaching, research, learning and social spaces. Highlights include state-of-the-art laboratories, an outstanding Learning and Resource Centre and four lecture theatres to enable experiential learning and group projects. The vibrant Student Village offers halls of residence, a cafeteria and a launderette, as well as an indoor games room and outdoor badminton and basketball court.
The University of Reading Malaysia is situated in an increasingly popular student destination in the region. Iskandar Puteri has a wonderfully diverse culture and is also the fastest developing city in Malaysia.

The University is situated in the rapidly growing development region of Iskandar Puteri, in the state of Johor in the southern part of Peninsular Malaysia. By 2025, the aim is for Iskandar to be an ultra-modern ‘smart’ metropolis of three million people, offering green energy, vibrant neighbourhoods and first-class transportation systems. The University of Reading Malaysia is committed to playing a key role in this visionary project.

We are situated in EduCity, which is a 350-acre complex and is one of the most advanced university sites in Southeast Asia, providing an attractive environment perfect for studying and networking. Our campus is accessible by all forms of transport.

20 minutes to Senai International Airport providing easy access to 17 cities in the region

Home to 7 international universities and institutes of higher education, EduCity is a unique education hub, the first of its kind in Asia

45-minute drive from downtown Singapore

It is connected by 2 international airports and a high-speed rail link from Kuala Lumpur to Singapore (expected to be operational by 2026), with a station in Iskandar Puteri.

PRE-SESSIONAL ENGLISH

The University of Reading has a long history of welcoming students whose first language is not English, and supporting them with the skills they need in order to be successful at university. Pre-sessional English Language and Study Skills programmes developed over decades by the UK centre of excellence ISLI (International Study and Language Institute) are now available in Malaysia.

Pre-sessional English courses can feed directly into foundation, undergraduate and postgraduate courses at the University of Reading, without the need to take an IELTS or other external test.

Students on Pre-sessional English courses develop their academic reading, writing, listening and speaking skills, which boost confidence and enable them to successfully begin a university course at Reading in the UK or in Malaysia.

The Foundation, Study and Language Institute at the University of Reading Malaysia offers you two routes to improving your Academic English and Study Skills:

**UNIVERSITY ENGLISH 1**

An intensive course to help you meet the English Language requirements for a Foundation programme.

Entry level: IELTS 4.5 or 5.0; SPM 1119 (GCE-O) D.

Target level: IELTS 5.5 or 6.0; SPM 1119 (GCE-O) C.

**UNIVERSITY ENGLISH 2**

An intensive course to help you meet the English Language requirements for an Undergraduate programme.

Entry level: IELTS 5.5 or 6.0; SPM 1119 (GCE-O) C.

Screening test available if no current qualification.

Target level: IELTS 6.5 or 7.0; SPM 1119 (GCE-O) B.

**TEEP (Test of English for Educational Purposes)**

The TEEP, which forms the final examination given in University English 1 and 2, can also be taken as a stand-alone test.

Final grades for achievement on Pre-sessional English courses or on TEEP are expressed on a 0-9 scale, as used for IELTS.

Helping students achieve their full academic potential.

The Foundation Programmes at the University of Reading Malaysia offer students without A-level qualifications or the equivalent the opportunity to prepare for the academic and personal challenges of an undergraduate degree on our beautiful campus.

The university’s long established reputation for academic excellence and student support means that well-motivated and hard-working students will have a head start at joining undergraduate programmes at the University of Reading in either the UK or Malaysia.

Key Benefits of our Foundation Programmes:
• Teaching by experienced academics
• Access to all academic facilities at the University
• Guidance and support from your Personal Tutor
• The opportunity to gain a High Achiever’s Scholarship for the first year of your undergraduate degree

The Foundation Programmes at the University of Reading Malaysia prepare students for undergraduate study in three ways:
• Providing academic training in subjects related to your chosen pathway
• Giving you the transferable academic skills needed for undergraduate studies and beyond
• Developing your English language abilities

A small number of degrees require students to pass an interview or psychometric assessment, and we prepare students fully for these.

**CHOOSE YOUR PATHWAY**

We offer pathways to a range of degrees at the University of Reading in the UK and in Malaysia, as shown on the following page.

**ENTRY REQUIREMENTS**

**SPM:** Minimum of 5 at Grade C or above, excluding English for Science and Technology, Islamic Studies and Moral Studies

**IGCSE:** 5 passes at Grade C or above, in relevant subjects

**UEC:** Minimum of 4 at Grade B or above, excluding Chinese, and Bookkeeping and Accounts (Total of 24 points overall)

OR an equivalent international qualification

**For entry to MPharm degrees**

**SPM:** Minimum of 5 at Grade B or higher in Mathematics/Additional Mathematics, Biology, Chemistry, Physics and one other subject (including a Mathematics subject)

**English Language:**

**SPM 1119 (GCE-O):** Grade C or above

**IELTS:** 5.5 (no element below 4.5) OR an equivalent recognised English Language qualification

Students whose English level is at IELTS 5.0 or below or SPM 1119 (GCE-O) Grade D, are encouraged to participate in the University English 1 programme prior to starting the Foundation Programme.

**DURATION**

1 year

**INTAKES**

September and April

**FEES (2018/2019)**

**Foundation in Business**

Malaysians: RM 19,000 per annum

International Students: RM 23,000 per annum

**Foundation in Science**

Malaysians: RM 22,000 per annum

International Students: RM 25,000 per annum
FOUNDATION IN BUSINESS
(N/010/3/0173) (MQA/FA3723)

Get your business career off to a flying start by enrolling in our Foundation in Business programme.

This programme offers teaching in three business-related modules, as well as training in transferable academic skills. Successful completion of the Foundation in Business programme can lead to full degree-level courses at the University of Reading in either the UK or Malaysia, including programmes at its internationally renowned Henley Business School.

Typical degrees that students progress onto at the University of Reading Malaysia include:
• Finance and Business Management
• Accounting and Finance
• Management and Business
• Quantity Surveying
• Real Estate
• Psychology

Other degrees that students typically progress onto at the UK campus include:
• Accounting and Management
• Business Economics
• Business and Management
• Consumer Behaviour and Marketing
• Economics
• Entrepreneurship and Management
• Finance and Investment Banking
• Law

MODULES

All of the Foundation in Business modules are designed and taught by University lecturers and are therefore tailored with your future degree in mind. Students who wish to progress onto one of our highly regarded undergraduate programmes will be taught ‘Academic Skills’ and three modules relating to their chosen degree programme, chosen from:
• Economics
• Introduction to Business and Management
• Maths for Finance, Economics and Business
• Psychology

Students whose English level is below IELTS 6.5 or the equivalent will need to study our International English module in place of one of the above.

FOUNDATION IN SCIENCE
(N/010/3/0256) (MQA/FA3903)

Our Foundation in Science programme is the ideal starting point for a successful and rewarding science degree.

This programme offers teaching in three science-related modules, as well as training in transferable academic skills. Successful completion of the Foundation in Science programme can lead to full degree-level courses at the University of Reading in either the UK or Malaysia.

Typical degrees that students progress onto at the University of Reading Malaysia include:
• Pharmacy
• Psychology

Other degrees that students typically progress onto at the UK campus include:
• Chemistry
• Food Science
• Biochemistry
• Biomedical Sciences
• Microbiology

MODULES

All of our modules are designed and taught by University lecturers and are therefore tailored with your future degree in mind. Students who wish to progress onto one of our highly regarded science undergraduate programmes will be taught ‘Academic Skills’ and three modules relating to their chosen degree programme, chosen from:
• Biology
• Chemistry
• Mathematics
• Psychology

Students whose English level is below IELTS 6.5 or the equivalent will need to study our International English module in place of one of the above.
BSc REAL ESTATE
(N/341/60042)

Real estate such as offices, shopping malls, factories and houses is a major investment asset class. As land becomes scarcer, real estate has good potential to increase in value and grow one’s wealth. Study at the University of Reading Malaysia for the BSc Real Estate and be equipped to be a real estate professional.

Giving you maximum flexibility to design your degree to suit your own career goals, the first two years of this innovative programme focus on core studies in real estate. During your studies you have an opportunity to specialise in one of the following areas of the property sector:

• Appraisal & Asset Management
• Development & Planning
• Investment & Finance

Throughout your degree you will gain an in-depth understanding of core subject areas such as economics, finance, business management, planning, valuation, law and investment appraisal. You will also have numerous opportunities to apply your new-found expertise in the real world, allowing you to develop industry-relevant skills that will make you a highly sought-after graduate as you begin your career journey in real estate or associated professions.

This programme is rated 1st in the UK for Land and Property Management, according to the Complete University Guide 2017.

The UK International Student Survey 2015 gave this programme an overall satisfaction score of 93%.

This programme is recognised for further professional qualification with the Royal Institution of Chartered Surveyors (RICS), Royal Institution of Surveyors Malaysia (RISM) and the Board of Valuers, Appraisers and Estate Agents Malaysia (BOVAEA).

MODULES

Year 1
Core modules include:
• General Introduction to Law
• Introduction to Property Law
• Introduction to Planning and Building
• Introductory Economics for Business and Finance
• Investment Appraisal
• Projects in Real Estate and Planning I

Year 2
Core modules include:
• Applied Property Law
• Management in the Real Estate Sector
• Planning Law and Practice
• Projects in Real Estate and Planning II
• Property Valuation
• Real Estate Economics and Investment

Year 3
Core modules include:
• Applied Valuation
• Projects in Appraisal and Management
• Dissertation
• Development Appraisal and Finance
• Real Estate Asset Management

Please note that all modules are subject to change.

CAREER PROSPECTS

As well as offering a direct route into the property and planning professions, our programme provides a solid foundation on which to build a career in a wide range of other fields, such as finance, law, general management or consultancy, and opens up opportunities for further academic study.

Typical roles include:
• Real Estate Valuer
• Property Manager
• Real Estate Agent And Leasing Manager
• Real Estate Developer
• Commercial Real Estate Consultant
• Retail and Commercial Facilities Manager
• Real Estate Investment Fund Manager
• Real Estate Portfolio Manager
• Town Planner
• Auctioneer

BSc QUANTITY SURVEYING
(N/582/6/0011)

Learn about the mechanisms that determine the cost and price of construction, and how projects can be completed on time, to specification and within budget. This degree offers a great combination of academic excellence and practical expertise, as well as the opportunity to study flexibly for a degree that is recognised by professional bodies internationally, including the Royal Institution of Chartered Surveyors (RICS) and the Chartered Institute of Building (CIOB). It also has (provisional) accreditation from the Board of Quantity Surveyors Malaysia (BQSM) and the Pacific Association of Quantity Surveyors (PAQS).

This programme is rated 5th in the UK and 43rd overall for Architecture/Built Environment in the QS World University Rankings 2018 by subject.

Core subject areas include:

• Building science and technology
• Construction techniques and processes
• Building procurement, cost planning and project management
• Building information modelling (BIM) and computerised taking-off and quantification
• Sustainability

During the first two years you will develop a comprehensive understanding of the disciplines which underpin construction management and the surveying professions, such as economics, law, industry practice and building technology. We place a strong focus on employability; you will have the opportunity to network with industry professionals throughout the programme as well as taking up a placement during the term break, between your second and final years.

Firms offering placements for quantity surveying students include AECOM, Turner and Townsend, ARCADIS Design & Consultancy, MMC – GAMUDA, SUNWAY Construction, SP Setia, Eco World, Pakatan Ukur Bahan and Perunding Kos T&K, among others.

In the final year you will develop specialist knowledge of construction economics and contract law, with a particular focus on managing costs throughout the project life cycle from early design through to building completion and beyond.

MODULES

Year 1
Core modules include:
• Construction Science
• Construction Site Engineering
• Construction Technology
• Economics for Construction and Engineering
• Empirical Studies
• General Introduction to Law
• Information and Communication
• Principles of Management
• Projects I

Year 2
Core modules include:
• Building Environment Systems
• Building Pathology
• Building Technology
• Construction Contract Law
• Construction Economics
• Construction Procurement
• Construction Statutory Law
• Introduction to Quantification and Computerised Taking-Off
• Management in the Built Environment
• Research Skills
• Projects II

Year 3
Core modules include:
• Dissertation
• Project QS
• Quantification and Costing
• Sustainability

Please note that all modules are subject to change.

CAREER PROSPECTS

The vast majority of our graduates embark on careers in quantity surveying, although some choose to move into other construction roles such as project management, construction management or cost consultancy. Alternatively, you may opt to continue on to postgraduate study.

Get the best of both worlds with this fully internationally accredited degree.

For information on entry requirements, intakes and fees, please refer to pages 34 and 35
This course prepares you for a successful career in building surveying and offers you the opportunity to study flexibly for a degree that is recognised by professional bodies internationally, including the Royal Institution of Chartered Surveyors (RICS) and Chartered Institute of Building (CIOB).

You will benefit from the Department’s strong links with industry and the surveying profession. As with all of our surveying and construction courses, the programme structure provides an opportunity to explore a range of construction-related disciplines prior to specialising in the final year. You will be able to transfer onto other courses, such as Quantity Surveying or Construction Management, at the end of your second year if you wish to do so. A particular emphasis is placed on transferable skills and University of Reading graduates are renowned for rapid progression to senior positions within professional firms.

You will study in an internationally renowned department with strong industry links and an outstanding employability rating. This ensures that the course reflects not only the very best of current practice, but also the latest developments in areas such as Building Information Modelling (BIM) and sustainability.

Subject areas include:
• Building science and technology
• Construction techniques and processes
• Building procurement, cost planning and project management
• Building information modelling (BIM) and computerised taking-off, measurement and quantification
• Sustainability

MODULES

Year 1
Core modules include:
• Construction Science
• Construction Site Engineering
• Construction Technology
• Economics for Construction and Engineering
• Empirical Studies
• General Introduction to Law
• Information and Communication
• Principles of Management
• Projects I

Year 2

• Building Pathology
• Building Technology
• Construction Contract Law
• Construction Economics
• Construction Procurement
• Construction Statutory Law
• Introduction to Quantification and Computerised Taking-Off
• Management in the Built Environment
• Research Skills
• Projects II

Year 3
Core modules include:
• Commercial Surveying Practices and Advanced Building Pathology
• Building Surveying Project
• Dissertation
• Sustainability

Please note that all modules are subject to change.

CAREER PROSPECTS

Graduates of the degree in the UK have gone on to have successful careers as Building Surveyor, Operations and Maintenance Manager, Building Control Surveyor, Facilities Manager, Conservation and Heritage Manager, Project Manager and 7D BIM Manager at well established companies in public and private sectors such as Arcadis, Artelia UK, Constain, Henry Riley, Rider Levett Bucknall, Turner and Townsend, Vinci Construction, National Trust and British Waterways.

Study Building Surveying for a dynamic professional career in the Built Environment, providing services in disciplines such as building and heritage conservation, operations and maintenance, facilities management and project management.

For information on entry requirements, intakes and fees, please refer to pages 34 and 35
BSc CONSTRUCTION MANAGEMENT
(N/582/6/0015)

This course offers a great combination of academic excellence and practical expertise as well as a world-class opportunity to study flexibly for a degree that is recognised by professional bodies internationally, including the Royal Institution of Chartered Surveyors (RICS) and Chartered Institute of Building (CIOB).

This programme prepares you for a successful career in construction management. Not only does it offer you the opportunity to explore a range of construction-related disciplines prior to specialising in the final year but you will be able to transfer onto other programmes, such as Quantity Surveying or Construction Management at the end of your second year if you wish to do so. A particular emphasis is placed on transferable skills, and University of Reading graduates frequently progress into management roles within contracting firms, taking responsibility for all aspects of project management.

During your first two years you will develop a comprehensive understanding of the disciplines which underpin construction management and the surveying professions. We place a strong focus on employability and you will have the opportunity to network with industry professionals throughout the course as well as taking up a placement during the term break between your second and final years, for which you will gain credits that contribute towards your degree.

In the final year of the BSc Construction Management course you will develop the technical knowledge and practical skills needed for the management of construction operations. You will also complete a dissertation on a research topic of your choice and a construction management project, in which you will plan the construction operations for a building project.

Subject areas include:
- Building science and technology
- Construction techniques and processes
- Building procurement, cost planning and project management
- Building information modelling (BIM) and computerised taking-off, measurement and quantification
- Sustainability

Optional modules may include:
- Management of Construction Projects
- Construction Management Project
- Dissertation
- Sustainability

Please note that all modules are subject to change.

CAREER PROSPECTS

Graduates of the degree in the UK have gone on to have successful careers as Construction Manager, Project Manager, HSE Officer and Manager, Site Supervisor or Engineer, Facilities Manager and 5D BIM Manager at well established companies such as Arcadis, Artelia UK, Constain, Henry Riley, Rider Levett Bucknall, Turner and Townsend, Vinci Construction, National Trust and British Waterways.

Get BIM ready and become an expert in the planning and programming of operations in the digital construction system.

For information on entry requirements, intakes and fees, please refer to pages 34 and 35
The University of Reading Malaysia is a centre of excellence in pharmacy education and research. Our innovative, exciting and fully integrated programme prepares first-class pharmacy graduates ready for the healthcare challenges facing society.

Pharmacy is a diverse profession whose members help others in a variety of ways. Staff in the Reading School of Pharmacy Malaysia have a friendly and enthusiastic style, and will teach you the knowledge and communication skills that are essential to succeed as a pharmacist. Our four-year degree programme incorporates clinical training and scientific understanding, enabling you to develop an in-depth knowledge of key therapeutic areas.

Choose to study the MPharm 2+2 degree at UoRM and you can have the opportunity to study for two years at our Malaysia campus and two years at our campus in Reading in the UK. You will also have the opportunity to seek a pre-registration training post in the UK (subject to visa approval) before you sit your Pre-Registration Assessment and can register with the General Pharmaceutical Council.

During your first year, you will study scientific theory as well as taking part in pharmacy training programmes in hospital and community settings where you can apply your knowledge in real-life situations.

As you progress, you will learn more about the understanding and management of human diseases and undertake longer placements. This will be followed by a dissertation and your extended fourth-year research project which allows you to cover your chosen subject of interest in-depth, under the supervision of highly qualified researchers working at the Reading School of Pharmacy Malaysia.

Core subject areas include:
- Human physiology
- Cell physiology
- Medicinal chemistry

Preparing you for the healthcare challenges facing our society.
BSc Psychology

Fascinated by the human mind? This course will give you the opportunity to explore the human brain and how it interacts with the environment around us to determine our behaviour.

Understanding people and their behaviour is a complex matter; but once you do, it can be highly rewarding.

At the University of Reading Malaysia, we study psychology at many levels – from how the brain functions to the ways that individuals are affected by membership of a group. Learning from internationally regarded experts, you’ll be introduced to the latest evidence relating to a wide range of topics in the field of psychology, gaining a solid grounding in all the core areas of the discipline. And you will undertake work placements and applied projects that encourage you to link the topics you are studying to the issues experienced in ‘real-world’ settings.

Throughout the programme, you will be made aware of current research – its concepts, methods, findings and unresolved issues – and you will learn both how to evaluate others’ research and how to carry it out yourself.

In your final year, you will be able to tailor the course to your own areas of interest and career ambitions. You will study the latest research evidence relating to a selection of topics from psychology and neuroscience in depth. You will carry out an original research project that will add to current knowledge in that field and discover how psychological research can impact real-life practices in education, health and industry.

The psychology programme at the University of Reading Malaysia is accredited by the British Psychological Society (BPS), the professional body that oversees the quality of psychology degree provision in the UK. This accreditation gives our graduates eligibility for Graduate Basis for Chartered (GBC) Membership and, through this, access to postgraduate training courses in UK and elsewhere.

Modules

Year 1
Core modules include:
- Biopsychology
- Cognition and Learning
- Developmental Psychology
- Social Psychology and Individual Differences
- Psychological Research Methods
- Skills for Psychology

Optional modules include:
- Applied Psychology
- Clinical Psychology
- Debates in Psychology
- Psychology at Work (with work placement)

Year 2
Core modules include:
- Cognition
- Perception and Neuroscience
- Social and Differential Psychology
- Typical and Atypical Development
- Research Methods and Data Analysis
- Careers in Psychology

Henley Business School is among an elite group of business schools to be triple-accredited for the quality and capability of our faculty and output by the UK, US and European awarding bodies: Association of MBAs (AMBA), EMFD Quality Improvement System (EQUIS) and the Association to Advance Collegiate Schools of Business (AACSB). With campuses, offices and partnerships around the world, over 7,000 students from more than 100 countries and over 73,000 alumni in 150 countries, we are a truly international institution.

The Henley MBA is challenging, stimulating and relevant. Many of our students tell us it is life-changing. It is designed for experienced managers looking to develop their international management competencies. The programme combines the theoretical and real-world knowledge of our accomplished academics with practical applied learning to give our students a rigorous and rounded learning experience.

Modules including international business strategy, leadership and change, strategic marketing, corporate reputation and managing financial resources are designed to give you the broader business understanding and ability to think strategically required at the senior levels of business.

We seek to develop effective business leaders who are attuned to responsible and ethical business practice in challenging environments and uncertain times. Our intention is to develop you as an individual to help you become a better leader, sensitive to key business issues and emerging business trends – as well as to the wider social context. We aim to help you gain the confidence to think and act with clarity and conviction.

The Flexible Executive MBA is a blended-learning programme delivered at our state-of-the-art campus at EduCity in Iskandar Puteri, Johor, through a blend of face-to-face workshops, activities involving peer group learning in teams and self-study, on and off-line. Over the 33+ months of the programme, individuals study and share experiences with like-minded professionals from a wide variety of managerial backgrounds and business industries.

**METHOD OF DELIVERY**
- A combination of interactive workshops, teamwork, self-study and e-learning
- 25 workshop days over 2.5 years

You should anticipate 8–10 hours of self-study weekly.

**ENTRY REQUIREMENTS**
- A good first degree or equivalent professional or international qualification
- At least three years’ management experience
- Evidence of competence in English
- You must be able to gain access to company data for assignment purposes
- Prospective students without first degree may apply to MQA for APEL application (APEL T-7). Please kindly note the APEL application process may take up to 4-6 months. This is only applicable to Malaysian candidates aged 30 years and above. Please visit the MQA website www.mqa.gov.my for information on the APEL application

**DURATION**
33 months minimum, part-time, flexible blended-learning

**INTAKES**
One intake per year

**FEES**
Malaysians: RM 77,250
International Students: RM 77,250

**FINANCING YOUR MBA**
Most MBA programme members are self-funded or receive finance help from their employer. Additional funding options for Malaysian residents include:
MyBrain15 (MYMASTER)
EPF Education Withdrawal
The objective of this programme is to equip investment banking professionals with a working knowledge of Islamic finance. Islamic finance is well-entrenched within the conventional setting, therefore the programme has been designed to provide our students with the best of both worlds – using a global approach and perspectives. In some modules, students will be exposed to trading simulations in our state-of-the-art dealing room.

**KEY BENEFITS**

- A single innovative Master’s degree in both conventional (western) investment banking and Islamic Finance
- Awarded by the University of Reading, UK – a global top 200 university (QS World University Rankings 2018)
- Top quality Islamic Finance materials taught by Islamic Finance specialists
- An additional Professional Certificate in Islamic Capital Markets from INCEIF
- Industry visits and talks by Islamic Finance captains

**LEARN FROM EXPERTS**

Students will get the opportunity to learn from top-class international academics from the triple-accredited (AMBA, EQUIS and AACSB) Henley Business School, and INCEIF

Core modules include:

- Securities, futures and options
- Fixed income and equity investments
- Financial markets
- Islamic capital markets
- The principles of Islamic commercial jurisprudence
- Risk management of Islamic financial institutions

**METHOD OF DELIVERY**

- Lectures
- Tutorials
- Trading simulations for Securities, Futures and Option Module
- Seminars
- Workshops
- Industry visits and talks

A three-month study programme in Kuala Lumpur will allow students to learn from industry captains about how to apply their classroom learning experience in the real world global financial market.

**CAREER PROSPECTS**

We expect our graduates to pursue rewarding careers with investment banks in a wide range of fields, including:

- Corporate And Project Finance
- Specialist Structured Products and Derivatives
- Trade Finance
- Sales And Trading Research

In addition, they will be well-qualified to join:

- Specialist Institutions Offering Islamic Financial Services
- Regulatory and Standard Setting Agencies
- Multinational Corporations or Consultancies as Investment Managers
- Islamic and Conventional Investment Firms as an Analyst

Become an expert in the world of investment banking and Islamic finance.

**ENTRY REQUIREMENTS**

- Undergraduate Degree - Minimum 2:2 or equivalent; or an equivalent qualification or recognised by the Malaysian Government, acceptable to the University
- Degree Discipline – Any degree discipline but must have a satisfactory existing level of numeracy.

**ENGLISH LANGUAGE REQUIREMENT**

IELTS: 7.0, with no component below 6.0 or an equivalent recognised English Language qualification

**DURATION**

12 months full-time

**INTAKES**

September

**FEES (2018/2019)**

Malaysians: RM45,000 per annum
International Students: RM54,000 per annum
DOCTORAL PROGRAMMES

Our doctoral programmes provide graduates with an in-depth understanding of a specialist field at the forefront of the discipline and enable mastery of the research methods required in that field.

Under the supervision of leading international researchers, you will acquire the necessary skills and experience to conduct high quality, independent, original research in your field of study.

SUPERVISION

Your doctoral research will be supervised by two designated supervisors, who will have the necessary expertise and experience to adequately support you in your studies. Your supervisors will:

- help you to shape your doctoral research project
- guide you in determining what training you should undertake
- advise you on establishing networks and developing your career
- help you to complete a successful thesis within the requisite time period.

Visit our website at www.reading.edu.my/learn for the lists of PhD supervisors for each doctoral programme.

ENTRY REQUIREMENTS

Minimum upper second-class (2:1) Bachelor’s degree (honours) and Master’s degree (relevant to the discipline) or an equivalent qualification recognised by the Malaysian Government, acceptable to the University

ENGLISH LANGUAGE REQUIREMENT

IELTS: 7.0 overall, with no element below 6.0

INTAKE AND MODE OF STUDY

The PhD is a three to four-year full-time programme, but it can also be completed part-time over five to six years.

Students can begin their PhD at any time of the year. It is most common to commence studies at the start of the normal academic year in late September.

There are no application deadlines. However, to allow time for us to process your application and ensure you have time to source funding (if required), we recommend that you apply by the following dates:

- Malaysian applicants: No later than two months before you wish to start the programme.
- International applicants: No later than four months before you wish to start the programme.

FEES (2018/19)

Please refer to our website for the latest fees for doctoral programmes.
PhD IN BUSINESS AND MANAGEMENT (N/345/8/0944)

With its global reputation for business thinking, Henley Business School at the University of Reading Malaysia is able to provide graduates with an in-depth understanding in many areas of business. The high-quality programme enables mastery of the research methods required across these fields.

We are interested in considering research proposals in a range of fields, but we particularly welcome enquiries from highly qualified and motivated persons interested in undertaking projects in the following areas: Real Estate, Finance and Islamic Finance, Accounting, International Business, Economics, Digital Marketing and Supply Chain Management. We focus these research areas on technology and big data analytics, FinTech, digital currencies and marketing analytics in response to the growing significance of automation and Artificial Intelligence (AI). Under the umbrella of Henley Business School’s Centre for Global Business Enterprise and Cloud Analytics, you will develop cutting-edge knowledge that will position you at the forefront of your field, e.g. smart cities, cryptocurrencies and Internet-of-Things (IoT). With Malaysia being at the forefront of Islamic finance, we also undertake research supervision in Islamic banking and finance with a focus on sustainable finance and financial inclusion. You will also enjoy a dynamic research environment, competitively-awarded funding, dedicated support and outstanding facilities.

Henley Business School attracts some of the most influential academics and practitioners. As a postgraduate research student, you will benefit from the depth and breadth of its contacts in industry, the public sector and the not-for-profit sector, as well as opportunities to participate in the Henley Business School’s international community events and talks from key industry leaders and researchers.

PhD IN BUILT ENVIRONMENT (N/581/8/0088)

The School of the Built Environment has strong relationships with industry, professional institutions and governments around the world (and especially UK and Malaysia). This allows us to develop and transfer knowledge beyond the boundaries of the academic environment to provide you with the unique opportunity to conduct research in this part of the world.

The School draws together expertise across a range of disciplines including organisation and management, design, sustainability, procurement and economics. We particularly welcome interest from postgraduate students wishing to pursue research in topics related to our three main research pillars: Business Innovation in Construction, Digital Practices, and Transition Pathways to a Low Carbon Economy.

The Construction Project Management and Digital Technologies International Research Centre (DiTIC) was established in January 2018 with the vision of developing a Taiwan-Malaysia research platform for young researchers. The initiation of the DiTIC is in response to the New Southbound Policy – an initiative of the Government of Taiwan to boost cooperation and exchanges between Taiwan and 18 countries in Southeast Asia, South Asia and Australasia. The DiTIC is funded by the National Taiwan Science Education Center.

The DiTIC aims to become a hub for construction project management and digital technology, with a commitment to providing professional services in Southeast Asia. Graduates can take advantage of a variety of research topics currently being undertaken within the DiTIC.
**PhD IN PHARMACY**

(N/727/8/0077)

Reading School of Pharmacy academic staff conduct internationally competitive research across three research divisions: Pharmaceutics And Pharmaceutical Chemistry, Pharmacology, and Pharmacy Practice.

Our research strategy aims to link the health, physical and clinical sciences to promote the safe and effective use of medicines within internationally and nationally recognised research.

We would be willing to consider research proposals in any field of pharmacy, but particularly welcome enquiries from those interested in undertaking projects in the following areas: Physiology and Pharmacology, Medicinal Chemistry and Pharmaceutics, and Pharmacy Practice and Education.

---

**PhD IN PSYCHOLOGY**

(N/311/8/0080)

Our PhD in Psychology gives graduates the opportunity to benefit from a vibrant and supportive research environment with internationally recognised researchers. Our labs are well-equipped with state-of-the-art equipment to help develop your research, including EEG and related physiological equipment, eye-trackers, observation suites and PC-based testing cubicles.

We would be willing to consider research proposals in a variety of psychology disciplines, but we particularly welcome enquiries from those interested in projects in the following areas: Cognitive Neuroscience, Developmental Psychology, Perception and Cognition, Cultural aspects of Psychology, Clinical Neuropsychology and Forensic Psychology.

Henley Business School is triple-accredited by the Association to Advance Collegiate Schools of Business (AACSB), the EFMD Quality Improvement System (EQUIS) and the Association of MBAs (AMBA).

Ranked UK #1 for Land and Property Management (Complete University Guide 2018).

The Henley Executive MBA is ranked UK #4 and world #36 (Economist Executive MBA Rankings 2015).

Ranked UK #5 and world #43 in Architecture/Built Environment (QS World University Rankings by subject 2018).

The University of Reading Malaysia’s Built Environment degrees are triple-accredited by Royal Institution of Chartered Surveyors (RICS), Chartered Institute of Building (CIOB) and Pacific Association of Quantity Surveyors (PAQS).

Ranked in the top 200 universities worldwide (QS World University Rankings 2018).

Reading School of Pharmacy ranked in the top 10 in the UK for Pharmacy and Pharmacology (The Guardian University Rankings 2017).

The University of Reading Malaysia’s psychology degree is accredited by the British Psychological Society (BPS).

90% of undergraduate programme lecturers hold PhDs.
As a student of the University of Reading Malaysia (UoRM), you are given the opportunity to study at the University of Reading (UoR) UK campus for part of your degree. Studying abroad at the UK campus is an exciting opportunity to enhance your future career options and gain subject knowledge, skills and experiences that will impress future employers and help you stand out from the crowd.

UoRM students who spend part of their degree at the UK campus will become enriched and well-rounded individuals as they will meet and collaborate with peers from different walks of life, be introduced to different learning methods, experience different cultures and improve their spoken English.

To find out more about the opportunities and eligibility, please ask the Student Services Helpdesk or contact the Admissions Team by emailing: my.admissions@reading.edu.my.
OUR HISTORY

The University of Reading has a rich heritage dating back over 150 years. We have continually invested in our facilities and our approach to teaching and research to make sure we are always offering the best, most relevant education.

1892
‘University College, Reading’ is founded as an extension college of the University of Oxford

1904
We welcome our first international student, hailing from Kenya

1908
Edith Morley, Professor of English Language, becomes England’s first ever female professor

1892
‘University College, Reading’ is founded as an extension college of the University of Oxford

1904
We welcome our first international student, hailing from Kenya

1908
Edith Morley, Professor of English Language, becomes England’s first ever female professor

1991
The ICMA Centre is established, which has grown to become one of the world’s major centres of academic excellence in the study of financial markets

2008
Henley Business School launch the largest and most comprehensive business school in Europe

The University of Reading has a rich heritage dating back over 150 years. We have continually invested in our facilities and our approach to teaching and research to make sure we are always offering the best, most relevant education.
The University of Reading is created— we received our Royal Charter and with it, the power to award degrees.

First Malaysian student enrols to University of Reading.

The Administrative Staff College is founded, to later become Henley Business School, one of the UK’s first business schools.

The Whiteknights campus is opened in Reading, UK: our primary UK campus.

University of Reading is invited by the Ministry of Higher Education in Malaysia to establish its first overseas campus in Iskandar.

University of Reading Malaysia’s EduCity, Iskandar Puteri campus opens in Malaysia.

University of Reading celebrates the 90th anniversary of its Royal Charter.

University of Reading Malaysia graduates its first cohort of undergraduate degree students.
OUR ALUMNI

The University of Reading has more than 100,000 alumni in more than 145 countries across the globe – many of whom have gone on to play a significant role in the world.

Our alumni keep in close contact with the University. Thousands of our alumni support the University in areas such as student mentoring, graduate employment, fundraising and governance.

Our alumni include:

- Award-winning artists
- Ambassadors
- Broadcasters
- Composers
- Judges
- Producers & Directors
- CEOs & CFOs
- Michelin-starred chefs
- Prime Ministers and government ministers
- Vice-Chancellors
- Executive Directors of the world’s top corporations
See Lian Ong  
BSc (Hons) Quantity Surveying, 1974

Mr Ong is one of the most distinguished experts in his field. In 2011, he became the 130th President of the Royal Institution of Chartered Surveyors (RICS), the first non-British passport holding President in its 143 years of history.

Constance Leung  
BSc Land Management, 2002

Ms Leung graduated from the University of Reading in 2002, during which time she was accredited by RICS (Royal Institute of Chartered Surveyors) and The Royal Town Planning Institute (RTPI). Today she is an associate director at DTZ Consulting in Singapore.

Ooi Dai Jing  
BSc Finance and Business Management, 2017

Ms Ooi studied part of her degree at the UK campus. She was among the first cohort of degree students to graduate from UoRM in 2017. She was the first UoRM recipient of the EduCity Award for Outstanding Achievement.
OUR ACADEMICS

The University of Reading Malaysia offers students top-class teaching and resources across a range of subject areas. Each programme draws on our long-established reputation for academic excellence and tailored support to ensure that every student experience exceeds expectations.

Professor Teck Yong Eng
Head of Henley Business School

Professor Eng is a Professor of Business Enterprise and Analytics and the Director of the Centre for Global Business Enterprise and Cloud Analytics. He leads the delivery of the full range of UoRM business-related programmes, including the prestigious Henley MBA.

Professor Eng has a wealth of experience as a department head of various business schools in the UK and regularly consults and writes for policy think tanks and practitioners.

Kate Fletcher
Interim Head of Pharmacy

Ms Fletcher studied Pharmacy at the University of Nottingham, graduating in 1994 and joining the register as a pharmacist in 1995. During 20 years as an NHS hospital pharmacist she worked in a variety of clinical specialities. In 2005 she joined the University of Reading School of Pharmacy as its first Teacher Practitioner and was instrumental in developing the first MPharm programme at the School. In 2015, Ms Fletcher relocated to Malaysia to join the Pharmacy team at UoRM. During her time there, she has won a University Teaching Fellowship and become a Senior Fellow of the Higher Education Academy.

Dr Rachel Pye
Head of Psychology and Clinical Language Sciences

Dr Pye is an Associate Professor of Psychology, and joined UoRM in 2017. She was awarded a PhD in Psychology by the University of Reading in 2008 and worked there as a post-doctoral researcher before taking a lectureship at the University of Winchester. She returned to the University of Reading in 2014 and took on the role of Director of Teaching and Learning for undergraduate psychology programmes. During her time there, she won a Collaborative Teaching Award and a University Teaching Fellowship.
Dr Mohd Faris Khamidi  
Head of Built Environment and Academic Director for Research

Dr Faris is an Associate Professor and heads the delivery of the full range of Built Environment-related programmes at UoRM. He completed his PhD in Architectural Engineering from the Graduate School of Human-Environment Studies at Kyushu University, Japan, in 2005. His research interests include green building technology and sustainable construction. Dr Faris sits on numerous national bodies relating to the construction industry and facilities management.

Bruce Howell  
Head of Foundation, Study and Language Institute

Mr Howell is an Associate Professor of Language Assessment. From 2003 Bruce has developed extensive experience at the University of Reading in all areas of EAP (English for Academic Purposes), through Pre-Sessional English and In-Sessional English. He has directed English Language and Culture-based short courses, led the development of the University of Reading's Test of English for Educational Purposes (TEEP) and other assessments, and externally audited programmes at other UK universities.

Anne Vergis  
Head of Law

Ms Vergis is an Associate Professor of Law and joined UoRM in October 2014 from her previous role as Deputy Dean of Law at Taylor’s University. She is passionate about her work in academic leadership and management and has led the delivery of many law-related programmes from inception to launch. She is dedicated to the development of legal studies through innovative methods in teaching and learning.
The University of Reading Malaysia uses the latest in research-led teaching and learning methods.

As a research-led university, we base our teaching on the most up-to-date research evidence, taught by experts in their field. We offer students world-leading learning resources and one-to-one teaching and support. Our focus is on blended and experiential learning. Through team work, joint project collaboration with students in other programmes and industry placements, the learning experience is deepened.

We use the latest digital and online technology, such as podcasts and videocasts, to enhance the learning experience, give students greater control over time, place, path or pace and make the most of lecture and tutorial time. UoRM offers students the opportunity to study part of their degree at the UK campus. International experience is encouraged to increase global employability and engender greater understanding of different cultures.

The University of Reading is globally recognised for the quality of its research. According to the Research Excellence Framework 2014, 98 per cent of University of Reading research is internationally recognised, 78 per cent is classed as internationally excellent and 27 per cent is deemed world-leading. At UoRM, we aim to deliver top-class interdisciplinary research. Research-led learning is embedded in each programme across all levels.

*Research Excellence Framework 2014
Centre for Global Business Enterprise and Cloud Analytics

Henley Business School’s Centre for Global Business Enterprise and Cloud Analytics was established as a hub for researchers with a passion for simplifying the ways big data is analysed and used, in order to solve business problems. The vision of the Centre is to become a world-leader in advancing methods and models for addressing societal, environmental and economic challenges.

Taiwan-Malaysia Construction Project Management and Digital Technology International Centre (DiTIC)

The DiTIC was established under the School of the Built Environment at UoRM, to enhance engagement between Taiwan and Malaysia. Under the collaboration, UoRM and Tamkang University, Taiwan, are working together to build a hub for construction project management and digital technology, with a commitment to provide professional services throughout Southeast Asia.
SCHOLARSHIPS

The University of Reading Malaysia awards scholarships – some worth up to 100 per cent – to deserving and academically excellent students.

Applicants are selected based on their academic achievements and the socio-economic status of their family. In addition, there are various options and sources of financial assistance available, ensuring that the world-leading education that we offer is accessible and affordable for all.

OUR SCHOLARSHIPS INCLUDE

Provost’s Award
This scholarship, which offers the equivalent of a 100% bursary on fees, is available for the very best, high achieving students, subject to a written application and interview.

High Achiever’s Scholarship
Students who demonstrate exemplary academic ability and results will automatically receive this scholarship. Bursaries of up to 30 per cent of tuition fees are available, depending on the level of achievement.

Alumni and Family Discounts
Alumni discounts are available for alumni and children of University of Reading alumni. Family discounts are also available for students who have a family member working at the University of Reading Malaysia.

Scholarships are available for Foundation Programme applicants based on their academic achievements.

Please refer to our website for the latest details.
